

Ute Bolduan

I am actually working as Head of Administration for the Delegation to Switzerland and for the Principality of Liechtenstein.

What I am standing for: Fair treatment for all staff and social policy deserving this name, specifically important for a common work in our multicultural environment.

The specific environment of the EEAS, colleagues working outside Europe, requests specific surroundings: social security helpdesk, but also medical service having experience with the necessities and the requests of us. It is however important to support staff at headquarter: request for more personnel.

The overload of work should not go on: The Parliament explains that due to additional tasks of Lisbon it could not stop hiring staff. The same rights should be valid for the COM and especially for the EEAS.
