

Fabrizio ZACCARI

I'm Italian, former Police Officer, actually working as Security Officer at EEAS Headquarters, MDR B2 Division and as financial actor when needed.

I belong to the AST category and speak French/English/Spanish. Since 2007 I take part in the Trade Unions activity, notably for R&D, but not only and I still keep first-hand relationships with R&D representatives in other EU Institutions.

I am candidate for R&D, an historical and highly representative Trade Union within the European Institutions, in the *Near You* list. I will put forward the the interests of the EEAS staff vis-à-vis the Administration, all categories included.

My priorities are only and exclusively the legitimate expectations of the staff, to be supported at the most and in the interest of the Service.

My pet subjects are the expectations of the staff, the motivation originating from them, that are to be supported and defended at every stage in the Social Dialogue.

I commit myself in full for these purposes because I strongly believe that it's fair and I'll work on them without pursuing any personal interest.
