I am Local Agent since August 2000 and Contract Agent since October 2005. In June 2005, I was elected Local Staff Representative and in March 2009 I was elected as Staff Representative in the CLP HU (local committee for personnel working outside the EU) and later on in the CCP (central staff committee). Despite the apparently huge experience, I am still learning how to best serve the interests of Staff.

The world of staff representation and trade unionism is not a simple one. You need to understand how to navigate amongst various personal and corporative interests and make your voice heard. It is frustrating and very often deceiving. But the more is your satisfaction when you finally see the files you are working on improving and the dossier you are pushing for advancing. You understand then that you have to keep going because you can make the difference. That is why I ask you again to give me your support. I have been particularly active on many issues dealing with Contract Agents (appraisal and reclassification, rotation and mobility, special leaves and secondment, disciplinary procedures and others) and Local Agents (appraisal and reclassification, medical insurance and social fund, salary adjustments and others). I also am not... indifferent to Officials and Temporary Agents. You can count on me I will never let you down.
