

# Laura Di Rosa

I'm the webmaster in Strategic Communication Team in EEAS  
I started my career in European Institutions in 1981  
and I worked most of the time on internet websites and Press Service  
I speak english, french, spanish, portugais and of course italian, my mother tongue

During my career I worked for Information Technology Department and Press Service always as responsible of creation and maintaining of websites. I'm still motivated even if I'm in the Institutions since now 30 years and my past experience in 3 Staff Committees I hope will help in this new EEAS adventure.

As a staff representative, I would like to focus on career perspectives of all EEAS staff, HQ and delegation and put the whole staff and recognition of his work, regardless of category and place of employment, in the core of all discussions.

I would like to create a strong teamwork feeling between all of us and to create a working environment where we can find again the pleasure of working for a common scope.

This will allow the EEAS to grow up as a model in the relations between administration and staff
